March 27, 2006

Mr. Bernard P. Leber, Jr.  
Acting Environmental Manager  
Kaiser Aluminum and Chemical Corp.  
Trentwood Works  
P.O. Box 15108  
Spokane Valley, WA 99215-5108

Dear Mr. Leber:

RE: Kaiser Trentwood Site, PCB Remediation Work Plan, March 22, 2006

Ecology has completed review of the March 22, 2006 PCB Remediation Work Plan that was approved by EPA on February 28, 2006, for the Kaiser Aluminum Trentwood Works. Under the terms of Section VIII.C of Agreed Order No 2692, Ecology is approving this work plan based on the following contingencies:

- MTCA soil cleanup levels for PCBs should also be considered in addition to 40 CFR § 761.61(a) levels in determining removal actions, compliance, and reporting of soils left in excess of cleanup levels.
- Any soil removal that would take place under 2.c of EPA's February 28, 2006 approval must also take into consideration MTCA's PCBs soil cleanup levels. Ecology's review and approval of any soil removal action must be sought.

Ecology's approval of the PCB Remediation Work Plan does not relieve Kaiser of its obligations to comply with all TSCA, other federal, state, and local requirements. If you have any questions, please call me at 509/329-3543.

Sincerely,

*Teresita Bala*
